What is Resume?

- A resume is a summary of your experiences and skills relevant to the field of work you are entering.
- A resume is an accomplishment driven marketing tool for individuals seeking employment.
- A resume relates your experience to your career objective.

Difference between Curricular- Vitae, Resume & Bio-Data ?

Resume: A Resume is a document created and used by a person to present their background, skills, and accomplishments. Resume can be used for a variety of reasons, but most often it is used to secure new employment.

A resume is a one or two page “summary” of your skills, experience and education. Generally no more longer than a page or two.

Curriculum Vitae (CV) : A Curriculum Vitae is a longer and more detailed synopsis. Generally over a couple of pages long.

Bio-Data: Bio-Data files concentrate more on the individual and his attributes like height, weight, colour, skin complexion,...and more that describes the person the best.

What is the Purpose of a Resume?

- The goal of any good resume is to show that you are a **qualified candidate and a good match for the job.**
- The resume motivates employers to **interview you.**
- **Remember!** Most employers spend **10 – 30 seconds** scanning a resume. Keep your resume to 1 page!
